

# ACCESS HATCHES

ALL-METAL HATCHWAY AND HATCHWAY-LITE

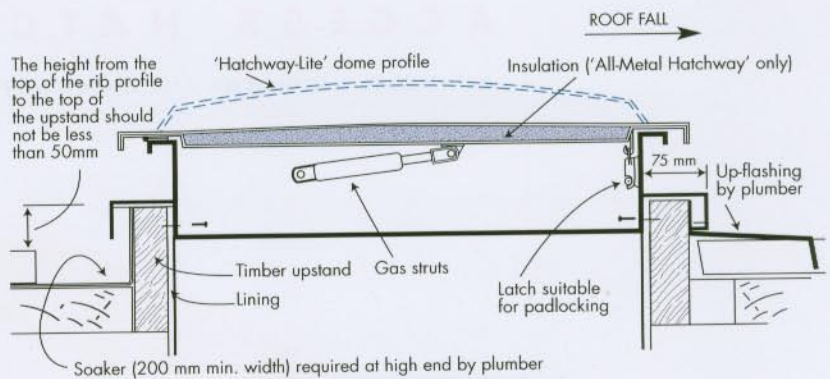

## FEATURES

- Atlite Skylites is one of the most recognised skylight manufacturers in Australia. As we also install our products, we are appalled by the condition of some of the metal roofs we inspect and the degree of difficulty we have getting onto many of these roofs. Metal roofs all over the country are deteriorating because of the lack of periodical inspections. Installation of an access hatch makes it easy for the householder or maintenance officer to make these inspections
- Allows easy access on commercial buildings for the servicing of plant and equipment
- All-Metal Hatchway has an insulated all metal top
- Hatchway-Lite has an opaque acrylic dome
- Gas strut assisted opening for operating safety
- Fitted with toggle clips to lock from the inside
- Available in colourbond, zincalume or galvanised finishes

It is imperative on rectangular-shaped access hatchways, that notification is given of the side to which the hinge arrangement is to be fitted.

The **All-Metal Hatchway** is available in five basic sizes which depict actual throat opening size. The lid is packed with insulation and hinged the full width of the unit. The gas-operated struts ensure safe operation when opening and the lid locks from the inside.

Upstand requirements for correct fitting

## STANDARD SIZE RANGE

Size (mm)	Throat Area (m <sup>2</sup> )
650 x 650	0.42
800 x 800	0.64
800 x 1200	0.96
1000 x 1000	1.00
1200 x 1200	1.44

Other sizes available upon request.

The **Hatchway-Lite** is available in five basic sizes, but it now admits daylight, serving a dual purpose. The glazing is a self-cleaning acrylic dome. The gas-operated struts ensure safe operation when opening and the lid locks from the inside.
