Atlite Skylights

Frankston, Victoria.

This magnificent home has glorious bay views and the client wanted skylights that could creatively enhance the design of the home.

Double glazed Atlite Energilites were installed in several custom shaped configurations along the length of the hallway providing abundant natural light, reduction in energy consumption and help this home achieve a five-star energy rating. The combination of shapes and ingenious selection of locations provide definite ‘wow factor’ and contribute to the striking design of this home.

JUDGES' COMMENTS

The judges were impressed by the energy efficiency delivered by the skylights as well as the variety of skylight shapes used in this project that greatly enhanced the overall design aesthetics of the home.
